Why Enterprises Choose Leadows

Engineering excellence for enterprise software, AI and digital transformation

Leadows partners with enterprises to build technology products, modernize business operations and accelerate digital transformation through custom software, AI and enterprise engineering.

40+

Engineering Team

10+

Years Experience

5+

Industry Domains

AI

Built Into Every Solution

Business-aligned Engineering

Technology decisions guided by business goals, scalability, reliability and long-term value.

Global Engineering

Engineering teams across India and Uzbekistan for enterprise software delivery.

End-to-end Delivery

Discovery, architecture, development, deployment, support and continuous improvement.

How We Help Enterprises Build, Modernize & Scale

Three connected pillars for software-led transformation.

01

PILLAR 01

Custom Software & Products

Build secure, scalable, AI-enabled enterprise software around real user and business needs.

- Enterprise Applications
- SaaS and Technology Products
- Internal Business Systems
- Legacy Modernization

02

PILLAR 02

Digital Transformation

Modernize operations by digitizing workflows, connecting systems and improving business visibility.

- Business Process Automation
- System Integration
- Dashboards and Reporting
- Mobile-Enabled Workflows

03

PILLAR 03

Enterprise AI & Training

Integrate practical AI into enterprise systems and enable teams through hands-on engineering training.

- Agentic AI Systems
- RAG and LLM Integration
- Workflow Automation
- Enterprise AI Training

Enterprise Capabilities

Integrated engineering capabilities that help enterprises build, modernize and scale with confidence.

Custom Software

Enterprise applications, SaaS products, portals, mobile apps and technology platforms.

AI Solutions

Agentic AI, enterprise copilots, RAG, document intelligence and workflow automation.

Business Process Automation

Digitize workflow, approvals, inventory, dispatch, sales and service operations.

Communication Platform

Omnichannel customer communication across WhatsApp, Telegram, SMS, RCS, AI chatbots and enterprise connectors.

Cloud Engineering

Cloud infrastructure, DevOps, CI/CD, monitoring, observability and scalable deployments.

Enterprise Training

Hands-on enterprise training in AI, cloud, and modern software engineering.

Every engagement combines engineering excellence, AI-first thinking and enterprise delivery practices.

Selected Case Studies

Operations • Healthcare • Life Sciences • Communication

Warehouse Operations Platform

Retail / E-commerce / Warehouse Automation

Helping a growing retail business digitize warehouse operations, improve fulfillment accuracy, and reduce return losses.

Client Challenge

- Manual warehouse operations
- location dependent picking
- High return losses
- Limited operational visibility

Solution Delivered

- Guided order fulfillment
- Barcode validation
- Real-time inventory
- Shopify integration
- Shiprocket integration
- Mobile workflows

ROI in Under 2 Months

Recovered software investment through reduced return losses and improved fulfillment accuracy

Mobile Workflows

Picker and Packager Apps

Barcode Validation

Reduced dispatch errors

Platform Integration

Shopify + Shiprocket

Technology Stack

ReactJS • Node.js • ExpressJS • MongoDB • Flutter • Shopify • Shiprocket

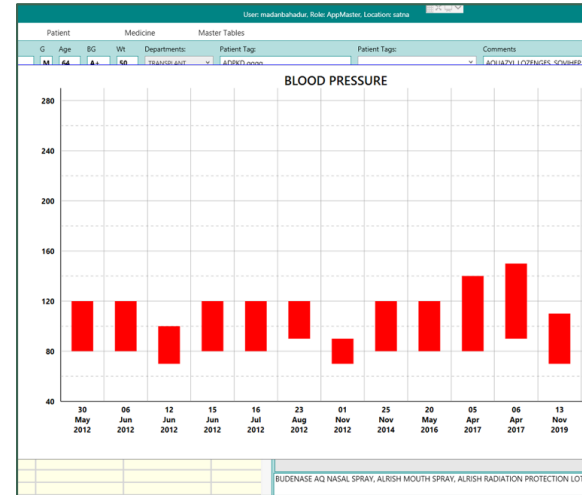

Enterprise Capability Presentation

Clinical Management System

Healthcare | Specialist Clinical Workflow Platform

Helping specialists manage complex patient histories, accelerate consultations and improve clinical decision making.

The screenshot displays a comprehensive patient record for Patient ID 1, BAT 123. The interface is divided into several sections: Patient Information (Name, Age, Sex, Weight, Height, Departments, Patient Tag), Patient Tags, Comments, and a detailed timeline of events, investigations, and prescriptions. The 'Events' section shows a timeline from 08-Jan-2021 to 28-May-2020, including symptoms like 'bad fever' and 'testing 30 min chunks'. The 'Investigations' section lists various tests such as 'RENAL PACKAGE', 'BLOOD PRESSURE', and 'HB'. The 'Rx. Prescriptions' section shows a list of medications including 'VELTIO (500 mg)', 'ERYFEG (100 UG)', 'KIDIT (L)', 'UPRASE (30 (50000 IU)', 'ALFUSIN (10 mg)', 'APIDRA (100 IU/ml)', 'ROSUVAS F (5 mg)', and 'THYRONORM (12.5 ug)'. The interface also includes buttons for 'Copy Prescription', 'Delete Prescription', 'Print', and 'Print To PDF'.

Client Challenge

- Large patient histories
- Repeat specialist consultations
- Investigation tracking
- Fast clinical access

Solution Delivered

- Digital patient records
- Clinical investigations
- Smart search
- Prescription management
- Trend analysis
- Multi-location access

600,000+ Patient Records

Supporting long term specialist care through faster access to patient history and investigations

Multi-location access

Secure access across hospitals & clinics

Clinical Trends

Visual patient history and investigation trends

Smart Search

Fast patient record retrieval

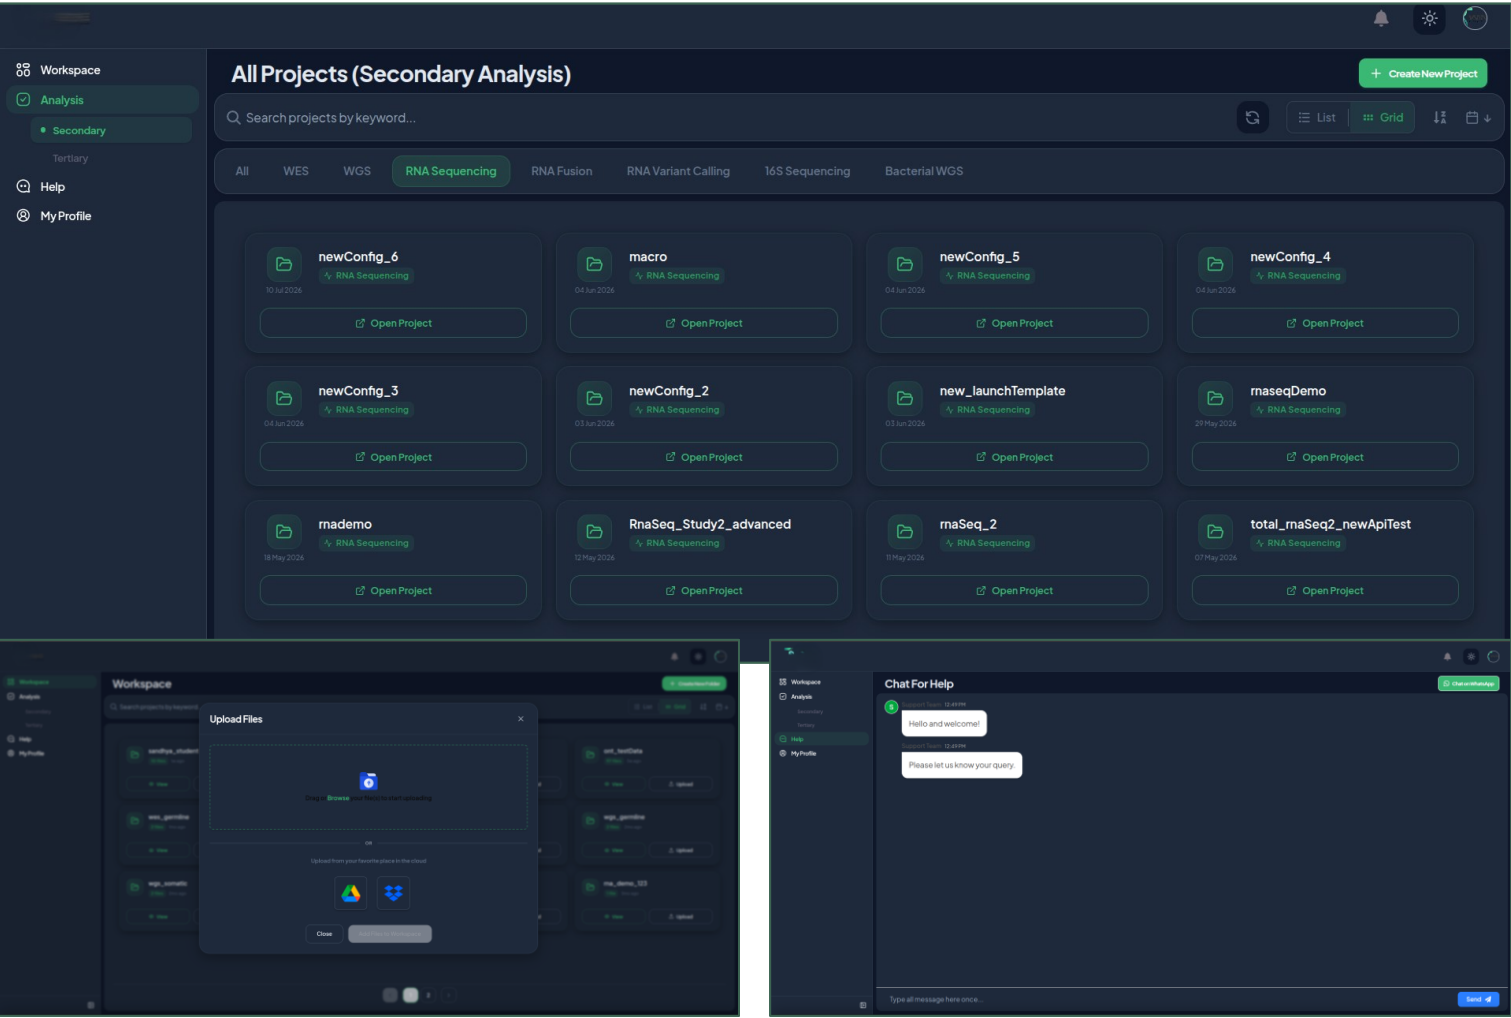

Technology Stack

WPF • ASP.NET Core • MySQL • Cloud deployment

AI-Powered Multi-Omics Research Platform

Life Sciences | Genomics | Cloud Bioinformatics

Helping researchers transform complex sequencing data into actionable biological insights through AI-enabled cloud software.

Client Challenge

- Complex genomic datasets
- Multi-omics integration
- Manual data interpretation
- Slow research turnaround

Solution Delivered

- Cloud-native platform
- No-code workflows
- AI-assisted interpretation
- Automated analysis
- Scalable architecture

Faster Scientific Insights

Accelerated genomic interpretation through AI-assisted workflows, enabling faster research, biomarker discovery and precision medicine initiatives

Multi-Omics

- Genomics
- Transcriptomics
- Proteomics
- Metabolomics

Cloud Native

Scalable processing of large sequencing datasets.

AI-Assisted

Faster interpretation & biological insights.

Technology Stack

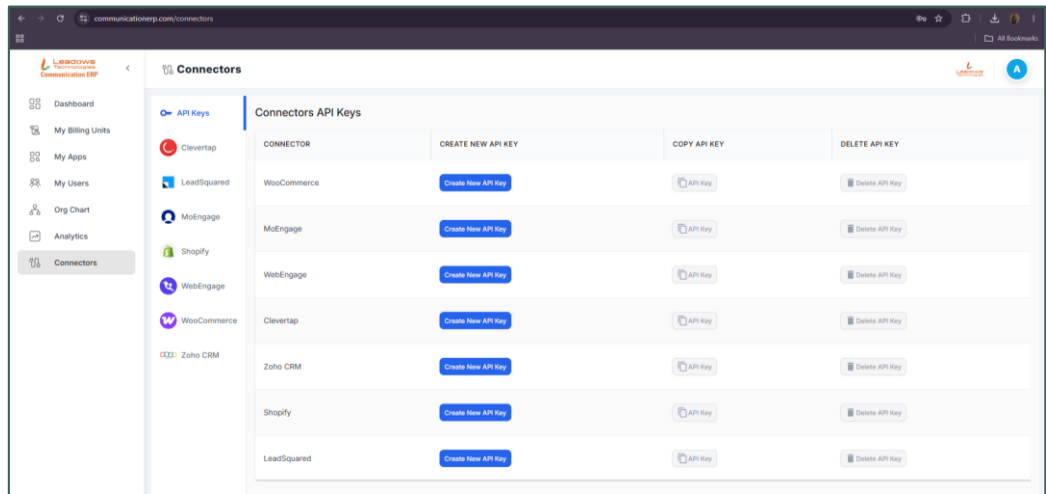

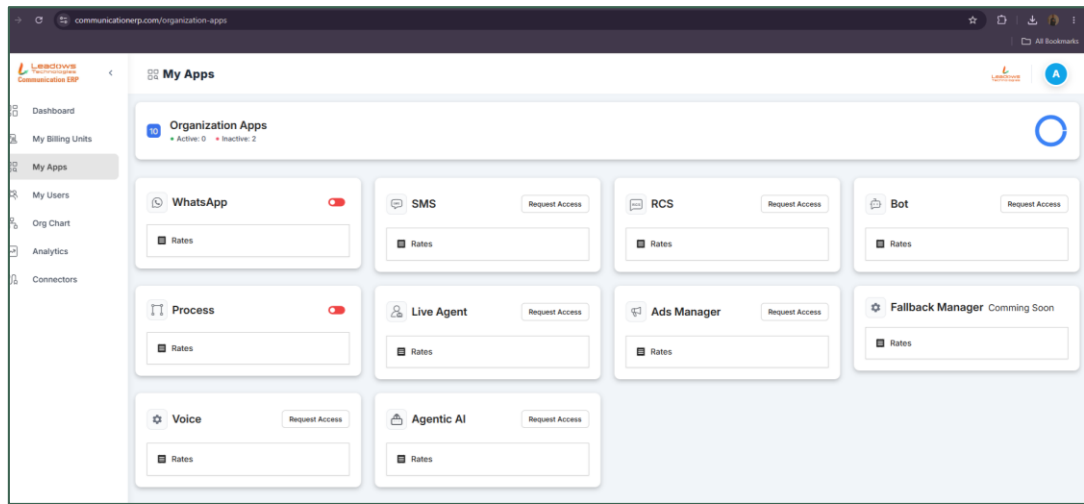

ReactJS • Tailwind CSS • AWS SDK • AWS Serverless • AWS Amplify

Product Platform

Enterprise Communication Platform

CPaaS / Omnichannel Messaging / Customer Engagement

Helping enterprises manage customer communication across multiple digital channels through a single unified platform.

Enterprise Capability Presentation

Business Challenge

- Multiple communication channels
- Fragmented customer engagement
- Manual campaign management
- Limited channel visibility

Key Capabilities

- Omnichannel messaging
- AI & rule-based chatbots
- Workflow automation
- Campaign management
- Enterprise connectors

Unified Customer Communication

Centralized customer communication across multiple channels, enabling faster engagement, improved customer experiences, and greater operational efficiency

Omnichannel

WhatsApp • SMS
Telegram • RCS

AI-Powered Automation

Agentic AI &
Rule-based chatbots

Enterprise Ready

Role-based Access
Enterprise Integrations

Technology Stack

ReactJS • Node.js • Spring Boot • Redis • PostgreSQL • Loki

OUR APPROACH

Our Digital Transformation Approach

A practical roadmap that helps enterprises move from manual operations to AI-enabled business execution.

Business Outcome

Real-time visibility • Faster execution • Better decisions • AI-ready operations

Leadows helps enterprises transform incrementally - building on existing systems rather than replacing everything at once.

How Clients Engage With Leadows

Flexible engagement models aligned with your business goals, delivery roadmap and transformation journey.

01 Project Delivery

End-to-end ownership for defined software initiatives.

- Discovery
- Solution Architecture
- Development
- Deployment
- Support

02 Dedicated Engineering Teams

Long-term engineering teams aligned to your roadmap.

- Developers
- QA
- DevOps
- Delivery
- Solution Architect

03 AI Consulting

Practical AI adoption for enterprise systems.

- AI Readiness
- RAG
- AI Agents
- Automation
- Data Integration

04 Enterprise Training

Hands-on engineering capability development.

- Agentic AI
- Modern Web
- Cloud
- Solution Architecture
- Hands-on Workshops

Every engagement is backed by enterprise engineering practices, transparent communication and long-term partnership.

WHY LEADOWS

Why Enterprises Choose Leadows

An engineering partner focused on building scalable software, delivering measurable outcomes, and supporting long-term business growth.

● AI-First Engineering

AI is considered from the architecture stage, enabling automation, intelligent workflows, and future-ready software

● Enterprise-Grade Delivery

Secure, scalable, and maintainable software delivered using proven engineering practices and modern architecture

● Long-Term Partnership

From discovery through post-production support, we remain engaged to help your software evolve with your business

● Uzbekistan + India Presence

Engineering teams across Uzbekistan and India, collaborating to deliver enterprise software with local engagement and global standards

Building intelligent software that creates long-term business value, not just successful projects.

Let's Build Your Next Intelligent System

Custom Software • Enterprise AI • Digital Transformation • Communication Platforms

Let's discuss your business challenge or product vision.
